

Real-World Projects Using Vue.js (PDF Handout)

Major Companies & Projects

Alibaba & Alibaba Cloud Console

Use Vue for internal admin dashboards and customer tools — chosen for flexibility and maintainability.

Xiaomi

Vue powers product pages and parts of their e-commerce sites, helping manage complex dynamic content.

GitLab

Migrated parts of its frontend from jQuery to Vue to modernize UI and improve maintainability.

9GAG

Uses Vue to handle interactive features and dynamic content updates while keeping performance fast.

Laravel Ecosystem

Vue is recommended in Laravel's default frontend stack and widely used in dashboards and admin panels.

Behance (Adobe)

Employs Vue for dynamic UI components and smoother user experience.

Nintendo

Japanese websites use Vue for product listings, news sections, and rich interactive UI blocks.

WizzAir

Airline booking flows and interactive pages leverage Vue's reactive state handling.

Grammarly (internal tools)

Uses Vue for some internal dashboards and management tools.

Reuters Graphics

Builds interactive, data-rich infographics using Vue and Nuxt.js.

Why Vue.js is chosen:

- Easier onboarding for new developers.
- Progressive adoption into existing projects.
- Smaller bundles → better mobile performance.
- Great developer tools & ecosystem (Vue Devtools, Composition API).
